AI Product Manager | Internal Platforms | Transforming Business and Helping Engineering Teams to Scale up and Eliminate Friction | Ex MercadoLibre (NASDAQ: MELI) & Mudafy (YC S19)
Buenos Aires, Provincia de Buenos Aires, Argentina

Extracto

Product Manager with 6+ years building and scaling digital products across SaaS, e-commerce and B2B/B2C marketplaces in LATAM. I specialize in translating complex business problems into scalable product solutions by combining product strategy, data analysis and close collaboration with engineering teams.

I currently lead product initiatives for Wave CRM at Willdom, where I define and drive the product roadmap while working with a cross-functional team of engineers to deliver features that improve pipeline visibility, CRM workflows and data-driven decision making.

My experience spans the full product lifecycle — from discovery and product strategy to delivery and iteration — focusing on building products that create measurable impact for users and businesses.

I'm particularly interested in the intersection of data, automation and AI, exploring how intelligent systems can enhance product experiences and operational efficiency.

Alongside product leadership, I continuously expand my technical knowledge in DevOps culture, Infrastructure as Code, data analytics and AI tooling to strengthen collaboration with engineering and accelerate product innovation.

Core Skills

Product Strategy & Roadmap
Product Discovery & Delivery

Experiencia

WillDom

Product Manager @ Wave CRM

julio de 2024 - Present (2 años 2 meses)

Fort Lauderdale, Florida, Estados Unidos

Leading product strategy and delivery for Wave CRM, a B2B SaaS platform built to improve pipeline visibility, sales operations, and data-driven decision-making for distributed teams. I own the full product roadmap working with a cross-functional team of 11 engineers — from discovery to shipping features that change how commercial teams find customers, manage opportunities, and act on data.

Platform impact · Source: PostHog (Jun 2025 – Mar 2026)

* ~94% growth in weekly active users (141 → 273 WAU), reaching an all-time peak in Feb 2026 with 200+ WAU sustained from Q4 2025 onward.

* 24% MAU growth (259 → 322) over 9 months with consistent platform-wide engagement.

* Week 1 retention above 80% across key cohorts — reflecting sticky core workflows.

* Hub (CRM) + Time Tracker drove 53% of all platform interactions (566K+ events); Time Tracker reached 263 unique users — broadest adoption of any feature.

*Median session of 6.5 min across 55K+ sessions; power users averaging 20+ min.

Key contributions

- Defined and executed the Wave CRM roadmap aligned to business priorities and user outcomes.
- Shipped pipeline management features: activity logs, follow-up workflows, recontact management, and time-in-stage tracking.
- Introduced dashboards, KPI widgets, and scoring systems enabling data-driven commercial decisions.
- Prototyped AI-assisted capabilities and automation to surface smarter recommendations inside the platform.
- Improved role management and system architecture to support multi-team and multi-org usage at scale.

Magoya

Group Product Manager

diciembre de 2023 - julio de 2024 (8 meses)

Argentina

Group PM for three simultaneous enterprise clients in digital agriculture — Xarvio (BASF EU), Bayer US (Climate FieldView), and Bayer Cono Sur — operating at the intersection of agronomy, data, and technology.

Xarvio (BASF EU)

Led end-to-end discovery: +10 farmer interviews in the US, competitive benchmarking, and market research presented directly to Xarvio US C-level. Delivered product definition with high-quality wireframes and a strategic map of upselling and cross-selling opportunities.

Bayer US / Climate FieldView

Developed internal applications on the world's largest field data platform, focused on wheat and corn — the two most important crops in the US market.

Bayer Cono Sur

Led the full development cycle of Cultivio and Experto Bayer, including an integration that consolidated 10+ dispersed internal tools into a single platform — reducing operational fragmentation for the regional agronomy team.

Common thread: global organizations with complex operations needing a PM who could understand the agricultural domain, translate it into product, and coordinate multidisciplinary teams without friction.

Novolabs

Product Manager - Partner for Startups Incubators & Accelerators
febrero de 2023 - diciembre de 2023 (11 meses)

Comunidad Valenciana / Comunitat Valenciana, España

Main responsibilities:

Project Management:

- Led planning and execution of 2 projects, ensuring objectives were met on time and within budget.

Coordinated interactions with 10+ stakeholders, including clients and project teams.

- Monitored and controlled project execution, tracking 20+ risks and issues, managing changes, and implementing effective solutions.
- Supported project teams, fostering a culture of teamwork and collaboration among 10 members.

Implemented performance indicators and continuously monitored and controlled objectives, ensuring a 95% project success rate.

Product Management:

- Contributed to product development and strategy, considering customer needs, market trends, and competitiveness.
- Collaborated closely with design and development teams, implementing 10+ new features and product improvements.
- Prioritized and managed a product backlog with 40+ items, ensuring alignment with product strategy and customer needs.

Mudafy

Product Manager @ CRM Team
octubre de 2022 - enero de 2023 (4 meses)

Argentina

PM at a YC-backed proptech with \$200M in annualized transaction value and a mission to make agents 5x more efficient than the industry average — in a market where the sector's historical NPS is -40. That efficiency isn't achieved with great agents alone; it's achieved with tools that eliminate operational friction at every step.

Key contributions

- Built Mudafy's internal CRM for visit and client feedback management — enabling agents to coordinate showings, log buyer signals, and keep pipelines organized across 50,000+ active properties and 1M MAUs.
 - Developed Data Studio dashboards to give the ops team real-time visibility without relying on manual reports.
 - Built a WhatsApp chatbot (MessageBird) to automate first contact and reduce lead response time — critical in a market where speed directly impacts conversion.
 - Conducted 50+ user interviews to identify friction points and prioritize the quarterly backlog.
- Created and tracked OKRs for 5 initiatives across IT, UX, and Sales Ops teams.

Paisanos.io

Product Manager

junio de 2022 - noviembre de 2022 (6 meses)

Argentina

PM at a software factory working across simultaneous projects in insurtech, retail, and gaming — the only coordination point between client, team, and external vendors, with no intermediate management layers. With teams of 5–6 (devs, designers, QA), clarity in product definition is what determines whether a sprint delivers value or rework.

Key projects

RUS — Online Insurance Quoter (Insurtech)

- Replaced a manual broker-based quotation process with a self-assisted flow that issues policies in real time via Nación Seguros API — reducing quotation time by 30% in 6 months.

Grido Club — Digital Loyalty App (Retail)

- Led discovery, definition, and delivery of the loyalty app for one of Argentina's largest ice cream chains, coordinating UX, dev, and QA from brief to production.

Core responsibilities across all projects

- Led discovery with stakeholders to define the real problem before writing a single line of spec.
- Coordinated with external vendors and managed roadmap, backlog, and sprint execution across 4+ simultaneous digital products.

Mercado Libre

3 años 8 meses

Product Commerce Coordinator - Autoparts , Motoparts & Agro + Apparel & Sports

noviembre de 2021 - abril de 2022 (6 meses)

Buenos Aires y alrededores

Coordinated product and commercial strategy across high-revenue verticals at one of LATAM's largest marketplaces (NASDAQ: MELI), managing a cross-regional team across Argentina, Mexico, and Brazil and working closely with IT, Product, Sales, Marketplace, and BI.

Fashion & Apparel — Size Guide

- Led the Fashion Size Guide from scratch — normalizing AR/US/EU sizing systems across brands and reducing incorrect-size returns in a vertical with 329M active listings and 40% YoY growth in Q1 2022.
- Designed a guide structure absorbing heterogeneous sizing systems per product domain, with automatic validation that pauses listings with incomplete data before reaching the buyer.
- Drove seller adoption directly with top brands, turning data completeness into a competitive advantage in a vertical growing 40% YoY.

Roadmap & Team Leadership

- Defined roadmap to close the product/IT gap in Fashion and position MELI as the main online destination for apparel in LATAM.
- Established and monitored OKRs for each team member aligned to MELI strategic objectives across 3 locations.

Product Commerce Analyst - Autoparts , Motoparts & Agro

septiembre de 2018 - octubre de 2021 (3 años 2 meses)

Greater Buenos Aires, Argentina

Built foundational product infrastructure for two of MELI's most technically complex verticals over 3 years, coordinating across IT, UX, Marketing, and BI to ship initiatives with measurable impact.

Auto Parts Compatibility Feature

- Led construction from scratch of the compatibility system for the vertical — reducing up to 7 duplicate SKUs per part down to 1 per listing, solving a structural problem for a user base where 85% of buyers are non-specialists.
- Designed the vehicle catalog and attribute structure (brand, model, year, version, position) and drove data entry across the full portfolio of brands and top sellers through workshops and adoption incentives.
- Accompanied the growth of auto parts e-commerce in LATAM from 6% to 13% market penetration since 2017.

Tires — Mercado Envíos Coverage

- Took Mercado Envíos coverage in the Tires category from 38% to 80%+ in 6 months, unblocking logistics operations for the top 15 brands in a top-3 revenue vertical.
- Coordinated across data, category, and operations teams to structure product sheets so every catalog variant could support shipping consistently.

Agro — L1 Category Launch

- Launched Agro as a standalone L1 vertical from scratch: designed the full taxonomy (Agricultural Machinery, Spare Parts, Beekeeping, Renewable Energy, Livestock Inputs), migrated 10K+ listings, and onboarded the top brands in the agricultural sector.
- Built technical attributes that didn't exist in MELI's catalog — machinery specs, agricultural compatibilities, input parameters — and adapted Mercado Envíos for high-volume, high-weight products outside the standard.

Data & Analytics

- Analyzed commercial behavior and category metrics via Tableau, Salesforce, MySQL, Looker, and Data Studio to drive data-informed product and commercial decisions.

Ford Argentina
Customer Success Analyst - Aftermarket

marzo de 2017 - septiembre de 2018 (1 año 7 meses)

Gran Buenos Aires, Argentina

Main responsibilities:

- Customer Segment Management: Managed 4 different customer segments: Dealers, Individuals, Ford employees, etc.
- Operational Efficiency and Customer Experience: Improved operational efficiency by 20% through data analysis and strategic insights. Enhanced customer experience, resulting in a 15% increase in customer satisfaction scores.
- Commercial Campaign Execution: Executed 10+ commercial campaigns tailored to meet the unique needs of assigned customer portfolios.
- Reporting and Tracking: Proficient in reporting and tracking techniques, ensuring the success of 5+ special customer initiatives.

Mercadolibre.com

Customer Experience Representative Jr

noviembre de 2016 - marzo de 2017 (5 meses)

CABA

Main responsibilities:

- Customer Support Representation: Represented customer support in the "Mercado Envíos" business unit.
- Informative and Commercial Contact: Maintained informative and commercial contact with 5 major LATAM carriers: Servientrega (Col), OCA (Arg), OCASA (Arg), Chilexpress (Chi), and DHL (Mex).
- Inbound Case Management: Managed 100+ inbound cases monthly via Salesforce CRM.
- KPI-Oriented Tasks: Focused on key business KPIs such as NPS (Net Promoter Score): Improved by 10%.
Rate of Recontact: Reduced by 15%.
Quality: Enhanced service quality, achieving a 95% satisfaction rate.
Productivity: Increased productivity by 20%.
- Agile Methodologies and Reporting: Utilized agile methodologies and reporting tools daily to streamline processes and enhance team efficiency.

Frigorifico Rioplatense S.A.I.C.I.F

Sales Intern

junio de 2015 - noviembre de 2016 (1 año 6 meses)

Gran Buenos Aires, Argentina

Main responsibilities

- Indirect sales through distributors.
- Management of assigned commercial portfolio.
